Objectives

1. Identify Companies that can offer internship and provide internships for our students
2. Promote Start-up culture among students
3. Arrange technical training for faculty and students
4. Provide facilities to carry out industry sponsored projects
5. Partner with Companies/Institutes for Content development and delivery

Scope: To provide a central facility for all the Engineering branches to learn industry best practises, and take-up industry sponsored projects and promote start-up culture among the enthusiastic students from across the branches. Organize and train the faculty and students on current and emerging technologies. Further, to provide state of the art computing facilities for the circuit branch students to develop software for the institute and also for the nearby industries.
