Students may select courses in digital applications, history and theory, advanced drawing, photography, visual training, design, management, and specialized independent studies.

Advanced courses in materials, construction technology, energy-conscious design and structures emphasize the interrelationship of engineering and design. At the same time, digitally-enriched electives will maximize you're readiness to use tomorrow's most sophisticated design, analysis, and presentation tools. Courses in entrepreneurship, project and design management and other subjects will prepare you for the day-to-day practice of design.

**Open Elective Course(OEC)** enables an exposure to some other disciple or domain to nurture the candidate's proficiency or skill. Open Electives can be choosen from the approved list of the institution, from subjects of study other than Design which will add value to the course and enable the overall development of the student.
